Profile Summary

Skilled Full stack web developer with experience in Python, MongoDB, HTML, CSS, JavaScript, Node.js and MySQL also with framework Bootstrap. I have quick learning and strong grasping ability with interests in learning and growing in the IT field.

Personal and University Projects

Project Education website

March 2023 – present

- Developed a website for educational purpose for students to take online recorded lectures and take notes after signing in website. In which front-end, backend and frameworks are used.
- Technologies used for front-end development are HTML, CSS and, JavaScript.
- Node.js with JavaScript is used in back-end and MongoDB for data management.

Regenerative Shock Absorber

Dec 2021- April 2022

- Designed a regenerative shock absorber to reduce the usage of electricity in vehicles and as result increase the efficiency of electric vehicles.
- It works on damping energy transfer, when a vehicle is running through rough roads then the shock absorber resist damping .This resistance is used in making electricity.
- This model is also installed in petrol as well as diesel cars.

Skills

- Python
- MySQL
- Front-end - HTML, CSS , JavaScript
- Backend - Node.js(Javascript) with MongoDB
- Framework - Bootstrap

Certification

Full Stack Web Developer

Aug 2022- present

- Pursuing an offline certification course for full stack web development from CETPA INFOTECH PVT LTD.
